BCGSoft Releases BCGControlBar Pro version 12.0

January 21, 2010 –St. Petersburg, Russia. BCGSoft Co Ltd today announced that BCGControlBar Professional Edition version 12.0 is available.

This is a major release that introduces many new features and enhancements including the MS Office 2010-style Ribbon Backstage View, new Office 2010-style color themes, resizable dialogs, new Ribbon Control gadgets and enhancements, Visual Studio 2010 color scheme support, Grid and Report Control enhancements and many other new and improved features.

New Office 2010-style color themes. Blue theme, Black theme and Silver theme of Microsoft Office 2010 Beta 1 are implemented now.

MS Office 2010-style Ribbon Backstage View. Added Microsoft Office 2010-style Ribbon Backstage View. Now developers can customize the appearance of Ribbon Application Button by setting a custom text, color and other visual attributes. The new, updated, Application Wizards allow usage "Backstage view" option when creating a new Ribbon-based application.

New Ribbon Control Gadgets and Enhancements. The Ribbon Control enhancements include the ability to add Ribbon Galleries to the dialogs, the ability to display a text label instead of icon in the "scenic" mode of The Ribbon bar Application ("main") Button.

Resizable Dialogs Support. This feature allows easily changing the layout of controls. Now developers may take advantage of resizable controls.

Visual Studio 2010 color scheme support. Now all controls, menu elements and other gadgets can be identically displayed like in Visual Studio 2010 Beta 2. It's also possible to apply the new Smart Docking style (semitransparent aero-style docking markers).

Enhanced Calculator Control. Calculator control has some significant improvements. The developers can add a lot of built-in extended calculator commands. All calculator buttons are drawn using image-based templates that provide a new, fresh calculator look.

Property Sheet Aero Glass Support. In this implementation PropertySheet control can be displayed in “Aero Glass” mode. The glass (aero) area can be combined with a page header. In general, this mode has been designed and implemented for Vista/Windows 7 Aero, but you can use it in any OSs/modes.

Grid and Report Control Enhancements. Added drag and drop support, the printing support has been significantly improved, implemented new visual themes (Office 2010-like and Visual Studio 2010-like) and enhanced keyboard navigation.

Enhanced TaskPane control. The keyboard and MS Active Accessibility support has been fully implemented for the TaskPane control.

The complete information about product features can be found on the company’s website <http://www.bcgsoft.com>
