### BCGSoft Releases BCGControlBar Pro version 15.0

**December 20, 2010 –St. Petersburg, Russia.** BCGSoft Co Ltd today announced that BCGControlBar Professional Edition version 15.0 is available.

This is a major release that introduces many new features and enhancements including the new Chart and Gauge controls, D2D support, Office 2010 print preview, new editor language schemes and many other new and improved features.

**New Chart Control.** The most advanced and professional chart on the MFC market today! This chart control offers a wide range of the different chart types: Line, Area, Bar and Column, Pie, Pyramid, Funnel and a lot of others. A developer can take the advantage of such useful features as Real Time Charting, History Mode and extensive customization of various chart properties.

**New Gauge Controls.** The library implements various types of gauges that help a developer to create high-quality, fast and beautiful digital dashboards. The following gauge types are implemented: Circular Gauges, Numeric Indicators, Color Indicators, Text Labels and Image Indicators. All of them provide great opportunities for customization.

**D2D support.** The library implements a large set of methods for easy access to D2D and DirectWrite interfaces. All graphics primitives like lines, rectangles, ellipses, geometries, arcs, pies, pyramids and texts can be easily drawn with D2D speed and quality using just few lines of code.

**Office 2010-style Print Preview** (inside Backstage View). Now it's really easy to add this feature to your application.

**New Editor language schemes.** The new mechanism allows implementing the following language schemes: C++, HTML, BASIC, Pascal, C#, Assembler, XML, SQL.

**Other features** include **Ribbon Control** enhancements, improvements in **Grid Control** and a couple of new samples.

The complete information about product features can be found on the company's website
